Drummond Group Joins TWAIN Working Group Board of Directors

Testing and certification company to contribute to the advancement of the TWAIN standard

Raleigh, NC – June 28, 2016 – The TWAIN Working Group (TWG), a not-for-profit organization designed to provide and foster a universal public standard which links applications and image acquisition devices, today announced the addition of Drummond Group LLC to its Board of Directors. Uniquely positioned to assist developers in providing tested and interoperable products that work, Drummond Group will play an instrumental role in assisting TWG with the continued delivery of a communications standard that benefits the imaging industry as a whole.

Said Kyle Meadors, Drummond Group President, “We specialize in testing and refining products in a trusted and vendor-neutral environment. TWAIN has been an accepted standard in the technology industry for many, many years, and the TWG member companies consistently work hard to continue to deliver a standard that furthers the imaging industry and will accommodate future technologies. We joined the group because we are confident that we can assist TWAIN in gaining further market acceptance and recognition, and we are certain we can contribute to the refinement of the standard with our testing and certification expertise.”

“The addition of a testing and certification company to the TWAIN Board is the perfect complement,” states Jon Harju, Chair of the TWAIN Working Group and CTO at Visioneer Inc. “Drummond Group offers the skills and experience that are required for developing standards that enable vendors to become a recognized and trusted part of a complete solution. We are very excited to welcome Drummond Group as a new TWAIN board member and look forward to working together.”

About Drummond Group LLC

Founded in 1999, Drummond Group LLC is a leader in innovative, global software testing and certification and acts as a catalyst to advance and tie together technologies, standards, security and interoperability in vertical industries – smart grid, automotive, health care, financial services, government, petroleum, pharmaceutical and retail. As a trusted, experienced and accredited

interoperability test lab, the firm offers global test services through the product life cycle, including auditing, quality assurance, conformance and test consulting. For more information, please visit <http://www.drummondgroup.com>.

About The TWAIN Working Group

The TWAIN Working Group, established in 1992, is a not-for-profit association of industry leaders who have gathered to create a standard that benefits the imaging industry as a whole. TWAIN's purpose is to provide and foster a universal public standard which links applications and image acquisition devices. The ongoing mission of this organization is to continue to enhance the standard to accommodate future technologies. TWAIN generates multiple opportunities for application developers and users to access information and broaden the standard; through a developer's forum (twainforum.org), main website (twain.org), Wikipedia page and online self-certification process. Current members of the TWAIN Working Group include Visioneer, Inc., Avison Inc., ExactCODE GmbH, Fujitsu Computer Products of America Inc., InoTec GmbH Organisationsysteme, Kodak Alaris, Picture Elements, Ambir Technology, Dynamsoft, Epson, Spike Labs, PDF Association, Drummond Group and Hewlett Packard. More information about the TWAIN API and imaging standard can be obtained on The TWAIN Working Group's Website at www.twain.org.
