TWAIN Working Group Announces TWAIN Direct Developers Day

Event participants will develop a TWAIN Direct document scanning application in one day

Raleigh, NC – July 27, 2022 – The TWAIN Working Group (TWG), a not-for-profit providing and fostering a universal public standard for image acquisition devices, today announced that it will hold a TWAIN Direct® Developers Day November 9, 2022, in Tampa, Florida, with optional online participation. This event will encourage scanner manufacturers, Independent Software Vendors as well businesses evolve their Capture strategy with driverless web and mobile document scanning applications by eliminating the need for legacy USB scanner connectivity. TWAIN Direct® Developers Day attendees will create a functional TWAIN Direct scanning application with direct hands-on support and supervision of the TWAIN Working Group team of experts. This event is supported by Silver Sponsor Visioneer, Inc., Bronze sponsor Verve Corporation and Media Sponsors Workflow Magazine and Document Imaging Report.

TWAIN Direct is designed to provide application developers with a simplified and universal approach to directly integrate and support any brand or model document scanner via client or web-based application, regardless of its operating system. TWAIN Direct eliminates the need for costly and time-consuming hardware regression testing and limited operating system support of vendor provided drivers and API's. TWAIN Direct supports network communications between applications and image acquisition devices which can be operated through any web browser-based device or operating system. In addition, TWAIN Direct can support any TWAIN based USB scanner using a TWAIN Direct Bridge application or Side Car solution.

“The TWAIN Working Group is very excited about this inaugural event, by providing developers an opportunity to develop a TWAIN Direct scanning solution. The upcoming Developers Day will be a steppingstone for hardware manufacturers and software developers to experience for themselves how easy and quick the development of a TWAIN Direct application really is.” stated Joseph Odore, TWAIN Working Group Chair. “This upcoming Developers Day is just another way the TWAIN Working Group is providing the Capture community with an easy-to-develop technology that is royalty free. The TWAIN

Working Group appreciates its members and event sponsors for supporting an event that will further drive adoption of the TWAIN Direct standard for the betterment of document capture market.”

About The TWAIN Working Group

The TWAIN Working Group, established in 1992, is a not-for-profit association of industry leaders who have gathered to create a standard that benefits the imaging industry as a whole. TWAIN's purpose is to provide and foster a universal public standard which links applications and image acquisition devices. The ongoing mission of this organization is to continue to enhance the standard to accommodate future technologies. TWAIN generates multiple opportunities for application developers and users to access information and broaden the standard; through a developer’s forum, main website and online self-certification process. Current members of the TWAIN Working Group include P3iD Technologies, Inc., ExactCODE GmbH, PFU America Inc., InoTec – a Datawin GmbH brand, Kodak Alaris, ICE Health Systems, Plustek, Inc., Atalasoft, Microtek, Inc., Dynamsoft, Epson America, Inc., LEAD Technologies, Visioneer, Inc., Hewlett Packard and PDF Association. More information about Developers Day participation and sponsorship, PDF/R, the TWAIN API and imaging standards can be obtained at pdfraster.org, twain.org and twaindirect.org.
