## 5 Ways to Perform Mobile Network Scanning

*An article by Dynamsoft, a TWAIN Working Group Member Company*

In a mobile first world, It's self-explanatory to utilize the built-in camera as the capturing device to take pictures of the document. What if you want to access the traditional scanners such as your Brother or Epson scanner as you would the same on a desktop browser? This article summarizes 5 different methods of how you can perform network scanning and a comparison between each method.

## How was the Infosource Capture 2022 Conference?

The TWAIN Working Group has been a long-time sponsor of the annual Capture events and was once again Sept. 7-8 at the beautiful Eaglewood Resort in Itasca, IL. TWG provided big updates on the progress of the TWAIN Direct project with both a presentation and demonstration table. The conference attendees represented a majority of the ISV and Hardware manufacturer players in the Capture industry, and an informative and fun time was had by all.

Stated Kevin Neal, TWG Marketing Committee Chair and TWG representative at the conference, *"My summary of this conference is that it's time for 'action' and there are real opportunities with lots of partners to create innovative, and modern, cloud capture solutions. No longer is 'the cloud' a debate, and there is no doubt about the value of capture with a direct network-attached document scanning architecture has many benefits, plus the use cases are, obviously, well understood by experts in Mortgage Loan Processing, Health Insurance, E-Invoicing and other industries. This is the formula to success. So the 'action' is to now create the cloud capture solutions of the future with TWAIN Direct. Never, ever, has this been more clear."*

## Helpful Resources

The TWAIN Working Group has an entire site dedicated to forums that provide support for the developer and user community. These forums are an excellent way to get answers to all of your TWAIN questions, from actual users with years of experience. [Visit our forums](#) to learn more.

ISVs and Scanner Manufacturers - learn all the benefits of TWAIN Direct adoption AND how to get started with these helpful [tools](#).

The TWAIN [Resource site](#) enables your company to feature a full profile with definition about services you can provide the TWAIN Community. Services and offerings can include development, hardware and testing services or anything TWAIN related. This resource site is leveraged by the user community as way to find providers to meet their specific TWAIN needs.

## Consider a Donation

The TWAIN Working Group is a not-for-profit organization dependent on volunteers from our member companies for development of all specifications and associated activities. As you can imagine, developing and maintaining a royalty-free, worldwide standard takes a lot of work, time and expense. Can you help us keep TWAIN free with a [donation](#)?
