

Welcome to the TWAIN Working Group Newsletter

Read on to learn more about a NEW TWAIN Direct API web services offering to help you jump-start your TWAIN Direct development projects, a great event the first week of October custom-made for information management professionals, how it went at the Infosource Capture & IDP Conference, and why you should hold your spot for TWAIN Direct Developers Day...

TWAIN Direct API as a Hosted Web Service

The TWAIN Working Group is pleased to announce that board our member company, P3iD Technologies Inc., is now offering the TWAIN Direct API as a

professional hosted web service. This new TWAIN Direct API web service offering greatly accelerates the time to complete document scanning software development projects by eliminating the need to install, deploy or maintain the infrastructure required to create a production level TWAIN Direct application.

"One of the greatest values of TWAIN Direct is that it's available as an API and for this reason, there is a lot of interest from multiple software developers that are building their next generation of edge capture capabilities within their applications." said Joseph Odore, Chairman of the Board for TWAIN Working Group. *"Therefore, the TWAIN Working Group is pleased to offer this great software development resource from P3iD Technologies."*

The TWAIN Direct API hosted service offering is available for:

1. [Commercial organizations and businesses](#)
2. [New and existing TWAIN Working Group members](#)
3. [Students and non-profit organizations](#)

The benefits of P3iD's hosted TWAIN Direct API include:

- Requires no IT involvement for setup, configuration, or maintenance
- Start developing within minutes
- Additional resources and web services API for a complete solution

For more information, please contact P3iD Technologies at twaindirect@p3idtech.com or 408-785-2005.

**Register today for the AIIM International / AIIM
Florida Solutions Showcase and Strategy Summit
Tampa, October 3-4**

**SOLUTIONS
SHOWCASE
& STRATEGY
SUMMIT**

Come see TWAIN Direct in action at the P3iD Technologies booth

This is an event for leaders and decision makers in information management, information technology, knowledge management, and information governance industry.

Attending this event provides tremendous value if you:

- Use, develop, deploy, provide, or consult on information management.
- Seek hands-on evaluation of multiple end-to-end, information management solutions from a single event.
- Would like to contribute to the strategic direction of AIIM and discuss the future of the industry.

At the Solutions Showcase & Strategy Summit you'll:

- Network with AIIM leadership and other information management leaders from the Southeast region and beyond in an intimate setting.
- Hear technical demonstrations and case studies from the leading information management providers in the Southeast, including P3iD
- Explore the future technologies within the information management industry.
- Celebrate the vibrant, local information management industry in the Southeast and show your support for local businesses.

The cost to attend is \$ 50 for Information Management Practitioners and Purchasers of Information Management Technology. Admission includes the cocktail reception with exhibits the evening of October 3. October 4 includes breakfast, keynotes, solutions presentations, lunch with some fun prize drawings followed by interactive sessions with the AIIM Leadership Council and Board during the afternoon, concluding with the Leadership Council Reception where all are welcomed!

What happened at the Infosource Capture & IDP Conference Sept. 6-7?

The TWAIN Working Group was a proud sponsor of the recent Infosource Capture & IDP event in Chicago. It was a great gathering of many industry leaders

in the Capture & Intelligent Document Processing space, where a lot of ideas were shared around the conference theme "the Future of Capture is Now – Unlocking the Power of AI to Drive Process Automation".

Kevin Neal, TWAIN Marketing Committee Chair presented "How to Monetize TWAIN Direct", and delivered important information about TWAIN Direct deployments in the wild, how AI can help generate TWAIN Direct tasks and why all of this should matter to hardware manufacturers and ISVs. View his insightful presentation [here](#).
